NEWS RELEASE

SOLATUBE INTERNATIONAL ANNOUNCES NEW “TWIST” TO PROVIDE EVEN GREATER INSTALLATION VERSATILITY, SAME GREAT LIGHTING PERFORMANCE

*World’s Most Popular Tubular Daylighting Device Brand Now Available
with New Zero-to-90 Degree Extension Tubes with Spectralight® Infinity*

(Vista, Calif.; February 28, 2006): Solatube International Inc., the worldwide leading manufacturer of Tubular Daylighting Devices (TDDs), has introduced a new zero-to-90 degree extension tube with the company’s proprietary Spectralight® Infinity tubing material. With this new feature available, the Solatube Daylighting System can now be installed almost anywhere without compromising lighting efficiency.

“Solatube Daylighting Systems have always provided homeowners with fantastic flexibility when it comes to where they can be installed,” said Robert Westfall Jr., Solatube International’s vice president, sales and marketing. “But from time to time, we would still encounter unusual applications that posed an installation challenge. Our new extension tubes provide the best solution – incredible versatility without sacrificing the best lighting performance available in the industry.”

The zero-to-90 extension tube is comprised of three built-in 30-degree angle adapters, which allow the tubing to bypass attic obstructions, jog across rafters or hide installation on an opposite roofline. Most importantly, the extension tubes are made with Solatube International’s exclusive Spectralight® Infinity, which allows these dramatic twists and turns to be made without compromising lighting performance. The zero-to-90 degree extension tubes are available on the Solatube Brighten Up® Series, which includes the Solatube 160 DS Daylighting System and Solatube 290 DS Daylighting System.

The new extension tubing provides an ideal solution for a variety installation obstacles including:

Residential:

- Wiring
- Ductwork
- Homeowners association restrictions prohibiting visibility of roof objects from the street
- Forced air units in the attic space
- Obstructions on the roof deck directly above the ideal dome location

Commercial:

- Fire sprinklers
- Cabling
- Ductwork

Solatube International Inc., based in Vista, Calif. (northern San Diego County), is the worldwide leading manufacturer and marketer of Tubular Daylighting Devices (TDDs). The company’s flagship product, the Solatube Daylighting System, provides a revolutionary natural lighting solution for all types of residential and commercial applications. The maxim “Innovation in Daylighting™” reflects the company’s commitment to the development of breakthrough daylighting technologies, which has resulted in numerous patents dating back to the mid-1980s. Widely recognized as the industry innovator, Solatube International has earned acclaim around the globe for its unrivaled ability to transform interior spaces with the power of daylight. For more information on the Solatube Daylighting System or other products manufactured and marketed by Solatube International, including solar-powered attic ventilation fans, please visit the Solatube website at www.solatube.com or call 888-SOLATUBE (888-765-2882).
