PRODUCT BULLETIN

SUBJECT: Solatube 750 DS ENERGY STAR Approval
--

Solatube International, Inc. announces that the Solatube® 750 DS Daylighting System meets the performance criteria established by ENERGY STAR.

The Solatube 750 DS offers superior thermal performance. Unique features such as Dual-Dome system, Raybender® 3000 technology, and Spectralight® Infinity Tubing work in concert to deliver the most energy efficient tubular daylighting device available. It is now possible to achieve remarkable energy efficiency without sacrificing daylighting performance. The Solatube 750 DS offers maximum light performance with minimal solar heat gain.

The following 750 DS products (closed ceiling configuration; insulation at the ceiling) meet the ENERGY STAR criteria:

- Solatube® 750 DS Daylighting System
- Solatube® 750 DS Daylighting System with Inner Dome (Acrylic)
- Solatube® 750 DS Daylighting System with Inner Dome (Polycarbonate – required for High Velocity Hurricane Zones)
