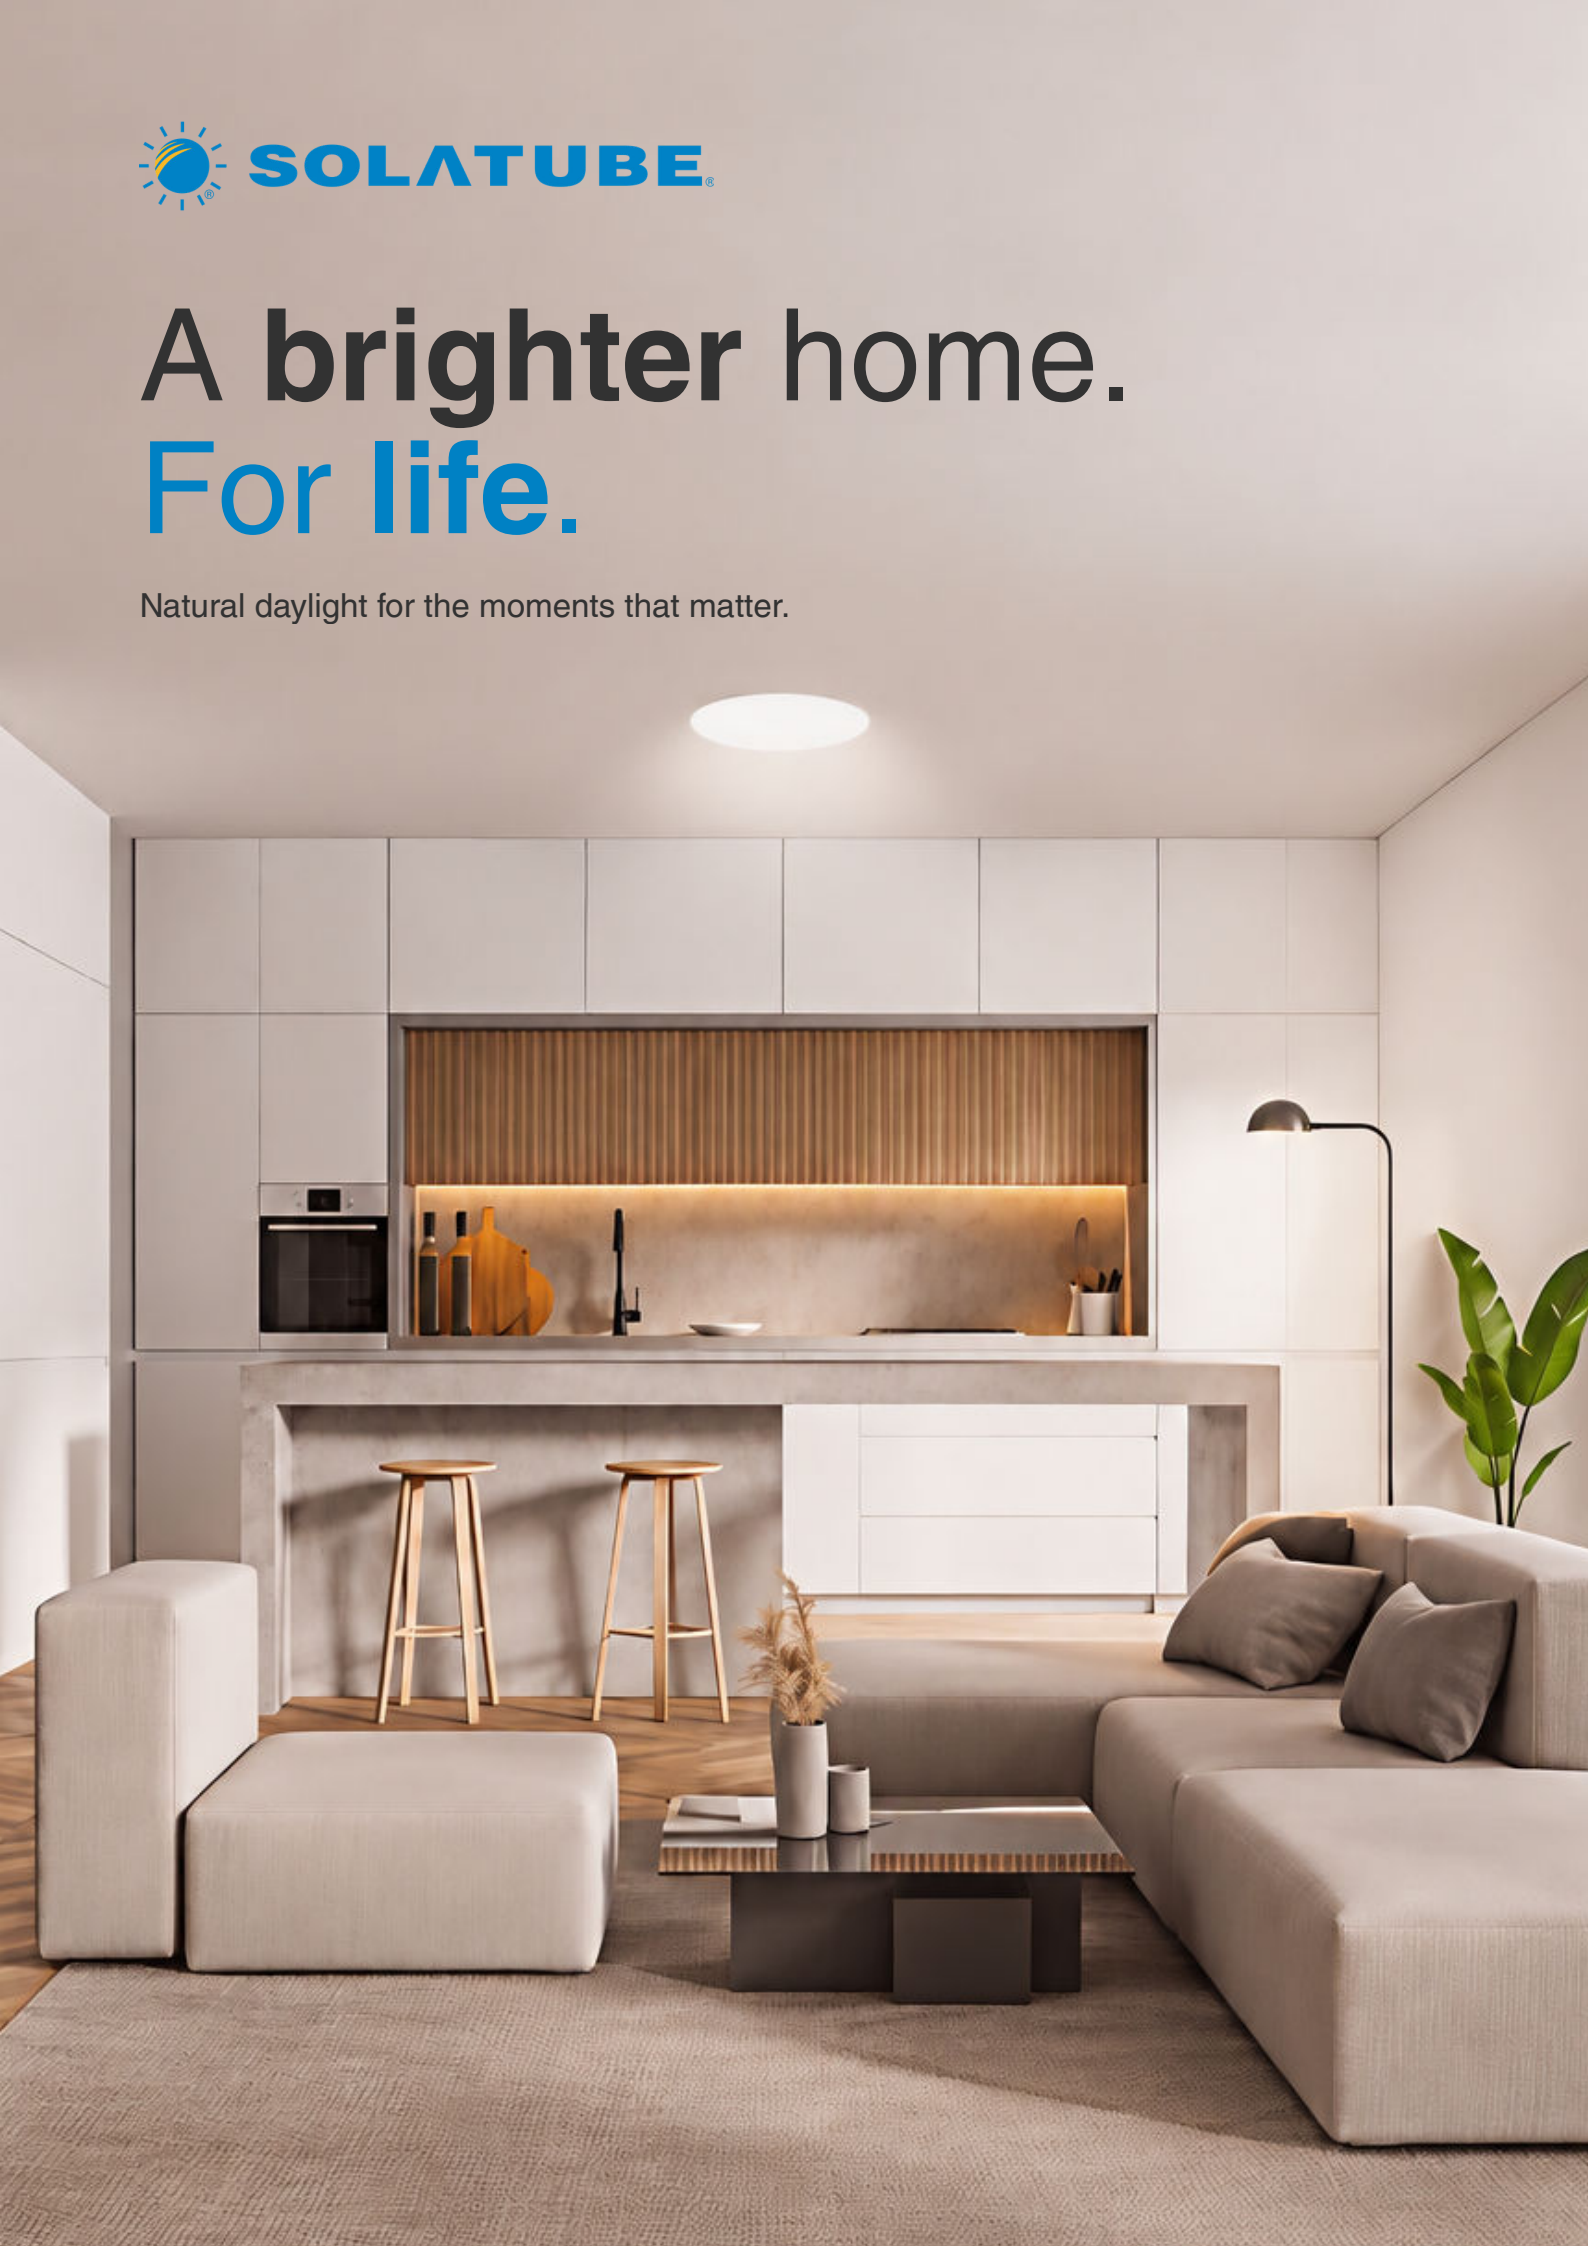
SOLATUBE®

A **brighter** home.
For **life.**

Natural daylight for the moments that matter.



It starts with light

Every home has a story. Light runs through all of it.

The first coffee in a new place. Little ones learning to walk down the hallway. Homework at the kitchen bench. Quiet mornings, years later.

As the years go by, the moments change, but the feeling of home stays with us.

We don’t always remember the ordinary days. But we remember the laughter, the conversations, and how good it felt just to be there.

And through it all, there was the light. A quiet presence in the background of everyday life, brightening the spaces where memories were made.

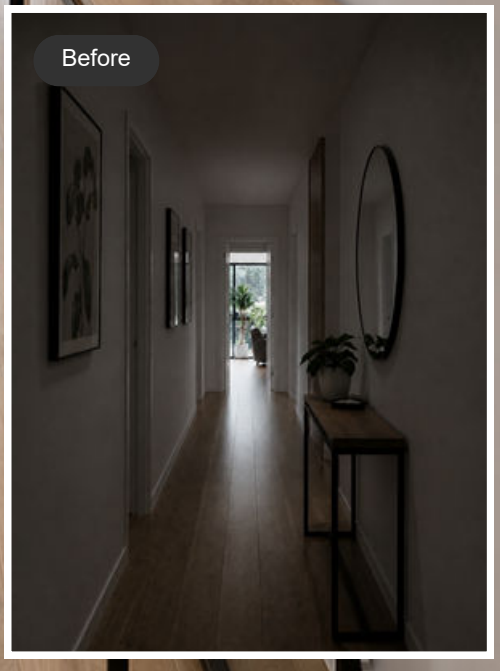
Your story starts here.
Let the light in.

After



Same hallway. Same afternoon.

The only difference is the Solatube® Daylighting System.

01 Why natural light

Because we feel better in it.

A lighter mood

Daylight lifts a room — and the people in it. Spaces feel more open, calm and welcoming.

True, natural colour

See your home as it really is: warmer timber, truer whites, richer colour.

Less reaching for the switch

Bright rooms during the day mean fewer lights on and less power used.

> Our hallway has been completely transformed! What was once a dark, depressing space is now so much lighter and brighter. I keep thinking I've left the lights on! I only wish we'd installed Solatube years ago.
>

Clever technology, from roof to ceiling.

Discover what makes Solatube different. Our patented technology captures natural daylight, transfers it efficiently through your roof space and delivers beautiful, even light into your home — throughout the day, all year round.

01 Capture

Raybender® 3000 Technology

Our patented daylight-capturing dome redirects low-angle sunlight to maximise light capture throughout the day, while helping manage harsh midday sunlight for more consistent daylighting.

LightTracker™ Reflector

An innovative in-dome reflector that redirects low-angle winter sunlight into the system, maximising light capture when the sun is lower in the sky.

02 Transfer

Spectralight® Infinity Tubing

The world's most reflective tubing, featuring **99.7%** specular reflectivity. It efficiently transfers natural daylight into your home while preserving true, natural colours.

INFRAREDuction® Technology

Integrated technology filters unwanted infrared wavelengths, helping minimise solar heat gain while preserving natural daylight.

03 Deliver

Brighten Up® Diffusers

Beautifully designed diffusers distribute natural daylight evenly throughout your space, with contemporary finishes to complement your home's style.

99.7%

Reflectivity.
The world's most reflective tube.

Why homeowners choose Solatube.

Blocks harmful UV

Filters nearly all harmful UV rays, helping protect your furniture and flooring from fading.

Easy installation

Designed to fit between roof framing, with quick installation and no major structural changes typically required.

Clean & contemporary

Sleek, modern diffusers designed to blend beautifully into your home's interior.

Energy savings

Enjoy natural daylight during the day while reducing your reliance on electric lighting.

Most homes have a room that needs the lights on — even at midday.

Solatube brings beautiful natural daylight into the spaces that need it most.

Hallways

Long, narrow and often the darkest part of the house.

Bathrooms & ensuites

Daylight without giving up any privacy.

Kitchens

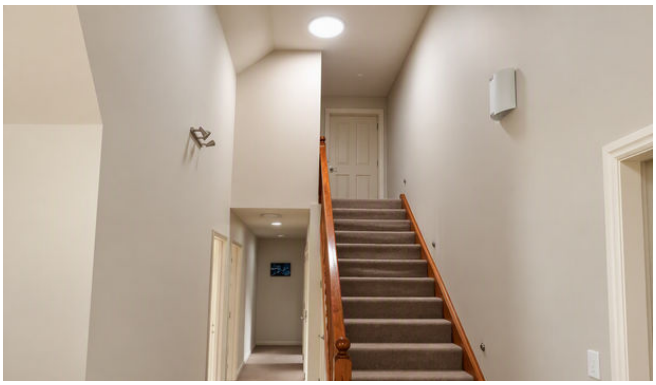
Brighter benches for cooking, homework and catch-ups.

Walk-in wardrobes

Finally, tell navy from black.

Laundries

Turn the room you avoid into one that feels fresh.



Stairwells

Safer steps, lit naturally through the day.

Choose the right size for your space.

Two systems, the same brilliant daylight. The right one depends on the size of your room.

Compact

Solatube® Daylighting System

160 DS

Ideal for smaller spaces, or used in multiples along hallways.

Small to medium

room size

Tube diameter	≈ 250 mm
Tube run	Up to 6 m

Best for

Hallways, bathrooms, laundries, wardrobes

Larger

Solatube® Daylighting System

290 DS

More light for bigger rooms and open-plan living.

Medium to large

room size

Tube diameter	≈ 350 mm
Tube run	Up to 9 m

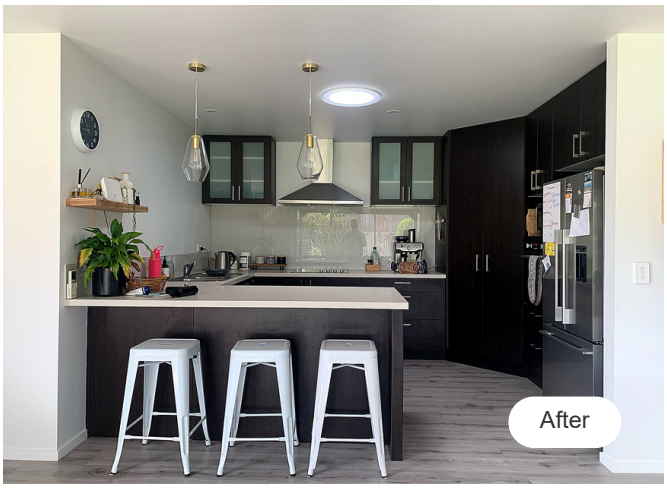
Best for

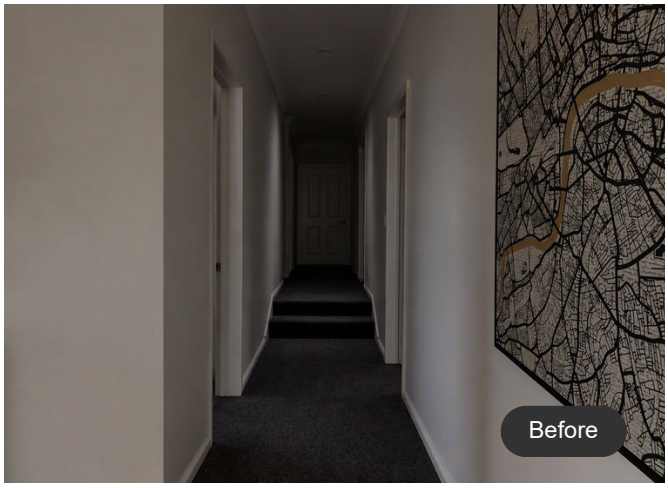
Kitchens, living areas, bigger rooms

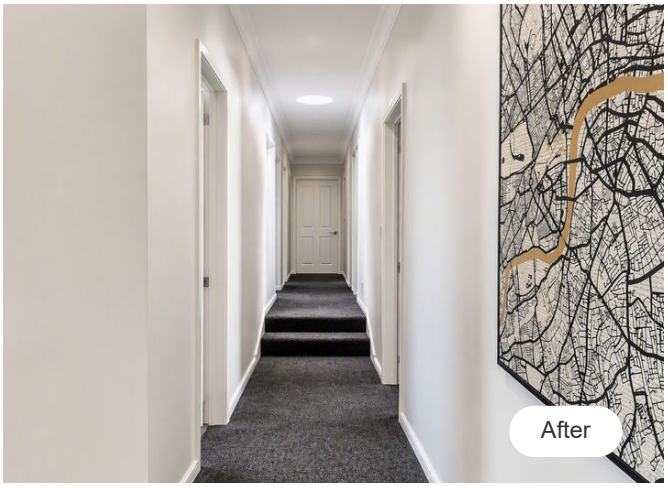
Not sure which one? Your local Solatube Licensee will recommend the right size during your free in-home assessment.

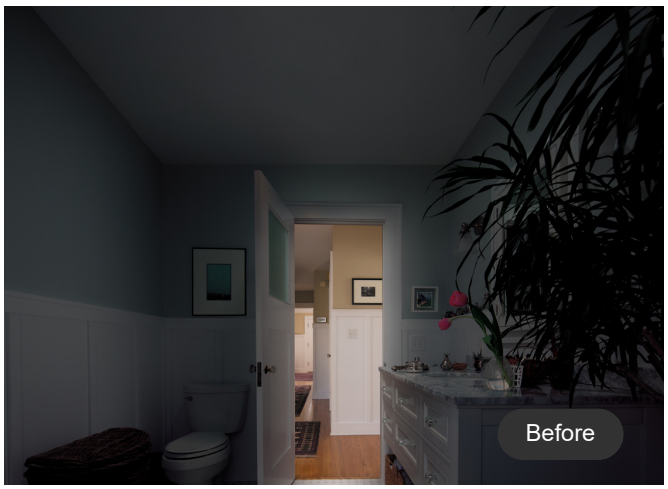
Same room. Same day. Just more daylight.

Sometimes, all a room needs is a little more natural light to feel completely different.









Now, make it beautiful.

Experience the next generation of skylights.
Meet the new Brighten Up® Skylight Series.

Every home has its own personality. Now, the way you bring natural daylight in can reflect yours.

Choose the barely-there elegance of ThinLine™ or the contemporary curves of Contour™. Two beautiful ways to bring light into the spaces you love.

Daylight delivery and design, completely reimagined.

The new Brighten Up® Series

Two designs. One brighter ceiling.

ThinLine™

Best for

Modern, minimal interiors

The ThinLine™ Collection proves that less really is more. With a ceiling profile up to 70% thinner, its ultra-slim design blends seamlessly into your ceiling, letting natural daylight take centre stage.

OptiView Round

A crystal-like Fresnel lens for bright, wide, even daylight.

OptiView Square

The same wide, even daylight in a bold square form.

SoftView Round

A smooth, glare-free pearlescent glow. Clean and understated.

SoftView Square

The same pearlescent glow with a more architectural edge.

Contour™

Best for

Living areas, feature rooms

The Contour™ Collection is designed to stand out. With sculptural curves and a bold, dimensional profile, it brings depth, character and contemporary style to your ceiling.

OptiView Frost Round

Fresnel optics with a frosted layer, spreading light high on the walls.

JustFrost Round

A frosted lens with subtle depth for soft, diffused daylight.

JustFrost Square

Soft, diffused daylight in a defined square profile.

TierDrop Round

Cascading contours create a refined halo on the ceiling.

Make it work for every room.

Optional add-ons that adapt your system to the way you live.

Light Add-On Kit

Daylight by day. A switched light at night.

Adds an electric light to the same fitting, so the room stays bright after dark — great for bedrooms, bathrooms, wardrobes and hallways.

Ventilation Add-On Kit

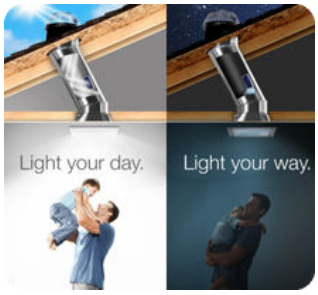
Fresh air and daylight, in one.

Combines ventilation and daylight in one tidy 2-in-1 fitting — ideal for humid bathrooms and laundries, with no extra clutter on your ceiling.

Solar-Powered Daylight Dimmer

From bright to softly dimmed — your call.

A remote-controlled, solar-powered baffle lets you set the light anywhere from bright to dark, at the touch of a button.



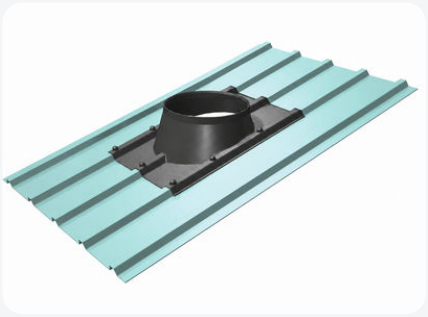
Solar-Powered NightLight

A gentle guiding light after sunset.

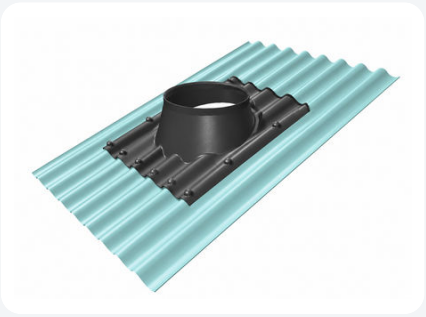
Stores the sun's energy by day, then gives a soft, automatic glow after dark — without using household electricity. Perfect for hallways, bathrooms and stairways.

Made to fit your roof.

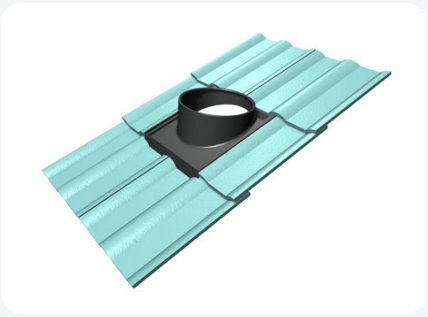
Solatube flashing kits suit most New Zealand roof types and pitches. Each one is formed as a single, seamless piece for leak-proof performance and is BRANZ Appraised.



Trimdek



Corrugated



Concrete tile

- Leak-proof, seamless design
- BRANZ Appraised
- Made to suit a wide range of roof profiles, with multiple flashing options available.

Comfort starts from the top.

A healthier roof space starts with better ventilation. Solatube solar-powered roof ventilation helps remove trapped heat and moisture, supporting a more comfortable home in summer while helping protect your roof space from dampness in winter.

Designed for quiet, reliable performance, our solar roof vents combine energy-efficient operation with durable, weather-resistant installation. A smarter way to care for your home, naturally.

Two models

V-Aero 250

Designed for smaller roof spaces, the V-Aero 250 delivers efficient, solar-powered ventilation in a compact design. Quiet, reliable and built to last.

Suitable for roof spaces up to 100 m².

RM 1600

Ideal for most standard-sized homes, the RM 1600* delivers powerful solar-powered ventilation to help manage heat and moisture. Reliable performance, season after season.

Suitable for roof spaces up to 250 m².

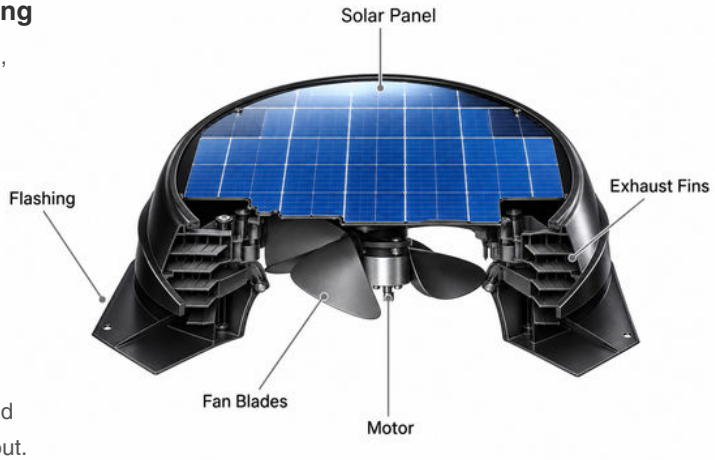
**Council approval may be required.*

Year-round ventilation

Helps remove trapped heat and excess moisture, keeping your roof space better ventilated all year round.

Customised roof flashing

Seamless one-piece flashing, customised to your roof.



Quiet, reliable performance

Designed for quiet, long-lasting operation, with quick installation and no major renovations required.

Built to last

Durable brushless motors and quality components throughout.

From dark to daylight. It’s that simple.
